

# Release Notes

## Enrollments Page/Enrollments Widget Enhancements

### General Overview

Currently, there is not a way to compare the ENROLLMENTS page to the number of enrollments in the Active Enrollments widget on the dashboard. This is because the Widgets make use of filtering that is not readily available from the ENROLLMENTS page at this time.

These additional filters include:

- Exclude Inactive Classes/Camps
  - Available, but must be selected from the Class/Camp filters by setting them to ACTIVE only. The ENROLLMENTS page currently defaults to ALL.
- Only Include Enrollments for Classes with Meeting Dates Within the Date Range • Not currently available from the ENROLLMENTS page at all.

To help alleviate confusion, we are adding a filter option to "Only Include Enrollments for Classes with Meeting Dates Within the Date Range" to the ENROLLMENTS page. When accessing the page by clicking on the "Active Enrollments" Widget, the system will then automatically set this filter and the Classes/Camps "Active" status filters to match the Widget settings.

**NOTE:** Because both the "Active Enrollments" Widget and the ENROLLMENTS page handle transferred enrollments differently, there may still be a slight discrepancy in numbers depending on the number of transferred enrollments within the date range being viewed.

## How will this benefit me?

By adding a filter option for "Only Include Enrollments for Classes with Meeting Dates Within the Date Range" to the ENROLLMENTS page and pre-filtering the page when accessing it from the "Active Enrollments" Widget, this should help reconcile the numbers reflected in the Widget with the actual enrollments reflected on the page.

## Where will I see these changes?

These changes will only affect the ENROLLMENTS page. (The "Active Enrollments" Widget itself is not being updated.)

## What is being changed/added?

We are adding a filter option to "Only Include Enrollments for Classes with Meeting Dates Within the Date Range" to the ENROLLMENTS page. When accessing the page by clicking on the "Active Enrollments" Widget, the system will then automatically set this filter and the Classes/Camps "Active" status filters to match the Widget settings.

## How does this work with existing settings?

When accessing the ENROLLMENTS page by clicking on the "Active Enrollments" Widget, the new filter will be automatically set based on the Widget settings. (That is, if "Only Include Enrollments for Classes with Meeting Dates Within the Date Range" is enabled for the Widget, it will be automatically enabled on the ENROLLMENTS page and vice-versa.)
