

Release Notes

Adding Enrollment Type & Attendance Filters to the Families Page

General Overview

The purpose of this task is to add Enrollment Type and Attendance Filters to the FAMILIES page. We currently offer these filters on the STUDENTS page but there is not a way to locate this same information for Families.

How will this benefit me?

This adds functionality to the FAMILIES page that was previously only available on the STUDENTS page. This gives you the ability to apply the same filtering criteria to families as you can for students.

Where will I see these changes?

These changes will affect the FAMILIES page only.

What is being changed/added?

We are adding the Enrollment Type filters that currently exist on the STUDENTS page to the FAMILIES page:

Selected Enrollment Status

All	Active	Trial
Makeup	Drop In	Waitlist
Inactive		

Active On Date

07/29/2020

Su M Tu W Th F Sa

When using these filters, a family should appear in the results if at least one student in the family matches the selected Enrollment criteria (as of the specified "On Date").

We are also adding the Attendance filters from the STUDENTS page to the FAMILIES page.

Selected Attendance

All	Present	Absent
Tardy	Left Early	Excused
Unexcused		

Present On Date

07/29/2020

When using these filters, a family should appear in the results if at least one student in the family matches the selected Attendance criteria (as of the specified "On Date").

How does this work with existing settings?

These filters will work in addition to any of the existing filters. For example, choosing the Enrollment Type "Trial" and filtering by Program would show only families with at least one student who had a "Trial" type enrollment in the selected Program (as of the specified "On Date").
