

# Release Notes

## Updates to Adding Option to Email the Family Full Ledger Report

### General Overview

The purpose of this task is to add the ability to email a copy of the Family Full Ledger Report directly from the family's ledger. Currently, this report can only be generated as a PDF.

To properly reflect what is happening, we are updating system behavior to properly reflect that when redeeming a punch pass for a class that meets multiple times per day, the Single-Day enrollment that is created actually encompasses all expected class meeting times.

### How will this benefit me?

This will make it easier to provide families with a copy of the Family Full Ledger Report.

### Where will I see these changes?

These changes will affect the family ledger view in the Office Portal.

### What is being changed/added?

We are adding the ability to email a copy of the Family Full Ledger Report directly from the family's ledger. Within the "Email Full Ledger Report" window, you will be able to apply the same report filters that are available when generating the PDF version of the report, as well as having the option to choose a custom email template to be used.

## How does this work with existing settings?

This update enhances current functionality but does not add or change any existing settings.
