

# Release Notes

## Roll Sheet Updates

### General Overview

The purpose of this task is to improve the filter options and display of the Roll Sheet Report (CLA-4) to allow customers to replicate the Roll Sheet Legacy Report while at the same time removing the need for two separate reports.

To accomplish this task, we are introducing some design changes and adding four additional settings to the Roll Sheet Report (CLA-4):

- Fit More Per Page - if enabled, this option reduces spacing and header font sizes to allow for more entries per sheet.
- Inline Header - if enabled, this option puts class details such as the schedule and instructor names on a single line instead of in multiple columns (which generally increases the amount of space needed to display the information)
- Repeat Class Info When Tables Wrap - disabled by default to reduce the amount of space needed to display these elements.
- Hide Legend - if enabled, hides the "Legend" table that explains each of the possible roll sheet icons that could be displayed.

### How will this benefit me?

By enabling or disabling these option, this will allow you to produce a "condensed" version of the Roll Sheet Report (CLA-4) that should more closely match the Legacy Roll Sheet report.

## Where will I see these changes?

These changes will only affect the Roll Sheet Report (CLA-4) when generated from either Reports > Classes or from the Classes page.

## What is being changed/added?

We are introducing some design changes and adding four additional settings to the Roll Sheet Report (CLA- 4):

- Fit More Per Page - if enabled, this option reduces spacing and header font sizes to allow for more entries per sheet.
- Inline Header - if enabled, this option puts class details such as the schedule and instructor names on a single line instead of in multiple columns (which generally increases the amount of space needed to display the information)
- Repeat Class Info When Tables Wrap - disabled by default to reduce the amount of space needed to display these elements.
- Hide Legend - if enabled, hides the "Legend" table that explains each of the possible roll sheet icons that could be displayed.

It is important to note that the "condensed" version of the Roll Sheet Report is intended to more closely resemble the "Legacy" version and therefore will not offer any of the new options that were not originally available on that version (such as displaying "Last Skill Level Passed", "Attendance Since Last Level Passed", etc.).

## How does this work with existing settings?

This update will enhance the filter options and appearance of the Roll Sheet Report (CLA-4).
