

Release Notes

New Filter for the Calendar Page

General Overview

The purpose of this task is to add a filter option to the Calendar page to "Hide If Attendance Taken." If enabled, the Calendar will not display any classes or camps for which attendance has already been recorded.

How will this benefit me?

It is essential that attendance is marked correctly, both for tracking a student's history and for the purpose of issuing makeup tokens. While iClassPro does offer a "Class Roll Not Taken" report (Reports > Classes > Cla-11), it can be cumbersome to go back through the Classes page and locate these dates to update attendance.

By adding a simple checkbox on the Calendar page, you will be able to see at a glance any classes that lack an attendance record. This will allow you to easily audit those classes and take action.

Where will I see these changes?

These changes will only affect the CALENDAR page in the Office Portal.

What is being changed/added?

This update will add a filter option to the Calendar page to "Hide If Attendance Taken." If enabled, the Calendar will not display any classes or camps for which attendance has already been recorded.

How does this work with existing settings?

This update adds an additional filter option to the Calendar page that will work in tandem with the other existing filters on that page.
